EXPERIENCE

Web Designer
DealerOn
2013–Present

- Design responsive web solutions on-the-fly in a deadline-driven production environment using the most efficient tool available.
- Refactored Bootstrap. Some changes include: Sass Maps for themeing, localized component variables, modular type scale, unit agnostic and new components.
- Developed non-technical employees into designers through weekly HTML and CSS classes.
- Maintain over 1000 stylesheets and templates.
- Collaborate with Dev team and other designers on projects.

Designer
Freelance
2010–Present

- Create advantageous digital solutions for clients within their budget, goals, and timeline
- Design print collateral, logo, and website for individuals, small businesses, and non-profits.

EDUCATION

Bachelor of Science
Full Sail University
2007–2010

Received Course Director's Award for excellence in 3D Modeling and Texturing.

INTERESTS

I love Jesus, spending time with my wife and being a father. When I'm not hunkered over my computer you can find me scaling a mountain, at the local basketball courts, or in the kitchen cooking it up, food that is.
